

## 1 Install

### MAC

Open **PRISM-1.3.1-macOS.dmg** and double-click **Install PRISM.pkg**.

Follow the steps. Your Mac asks for your password at the end. That is normal.

You get the AU and VST3 plugins and the standalone app in **Applications > Relooped**.

macOS 10.15 or newer, Apple Silicon and Intel

### WINDOWS

Run **PRISM-1.3.1-Windows-Setup.exe** and follow the steps.

The VST3 plugin goes to **C:\Program Files\Common Files\VST3**, the folder every DAW scans.

You also get the standalone app in the Start menu under **Relooped**.

Windows 10 or 11, 64-bit

## 2 Open your DAW

Rescan your plugins once.

FL Studio:

**Options > Manage plugins > Find installed plugins.**

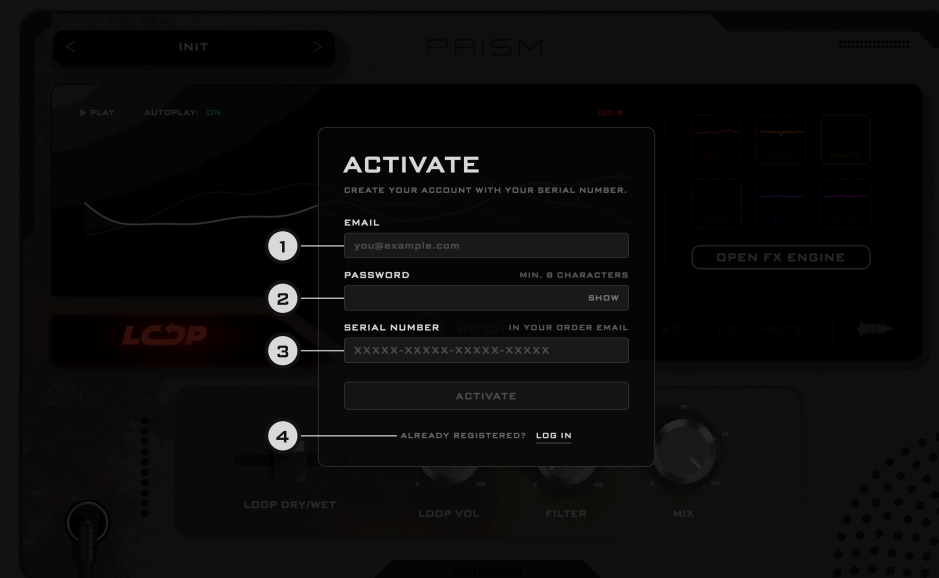

Then load PRISM as an effect on any track.

## 3 Activate

The first time you open PRISM, you see this form. Fill it in and click **ACTIVATE**.

- 1 **EMAIL** Your email address.
- 2 **PASSWORD** Choose a new password, at least 8 characters. You need it again on your second computer.
- 3 **SERIAL NUMBER** We email it to you after your purchase. It can take up to 10 minutes to arrive. Not there? Check your spam and promotions folders.
- 4 **LOG IN** Already registered on another computer? Click **LOG IN** and use the same email and password.

PRISM needs the internet once to activate. After that it works offline. One serial number works on 2 computers.

### UPDATES

The latest version is always at [relooped.de/pages/prism-multi-fx-looper-download](https://relooped.de/pages/prism-multi-fx-looper-download). Install it over the old one. Your presets and your activation stay.

### HELP

Questions, or moving PRISM to a new computer? Write to [info@relooped.de](mailto:info@relooped.de).
